

# iVIEW™ Suite

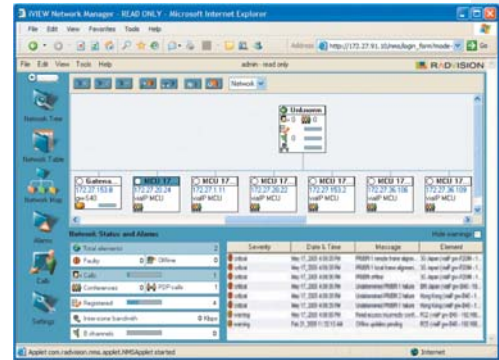

A comprehensive management solution for voice and video collaborative communications

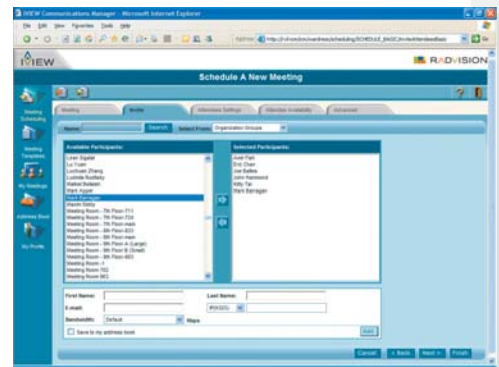

Efficiently manage and monitor your video network elements and easily schedule and control your meetings, for an optimal visual communications experience

## iVIEW Suite Highlights

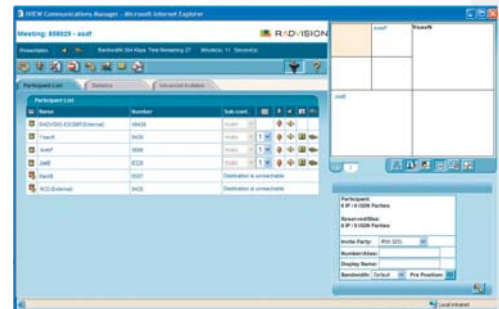

- **Global, centralized view of all video endpoints and network elements** enabling real-time control, monitoring and maintenance of each device from a single interface
- **Easy Web-based scheduling** and ad hoc videoconferencing providing resource reservation and bandwidth monitoring
- **Comprehensive multiparty conference control** allows users to easily invite additional attendees, mute and un-mute participants and change the meeting video layout
- **Microsoft® Outlook integration** for scheduling meetings via familiar applications

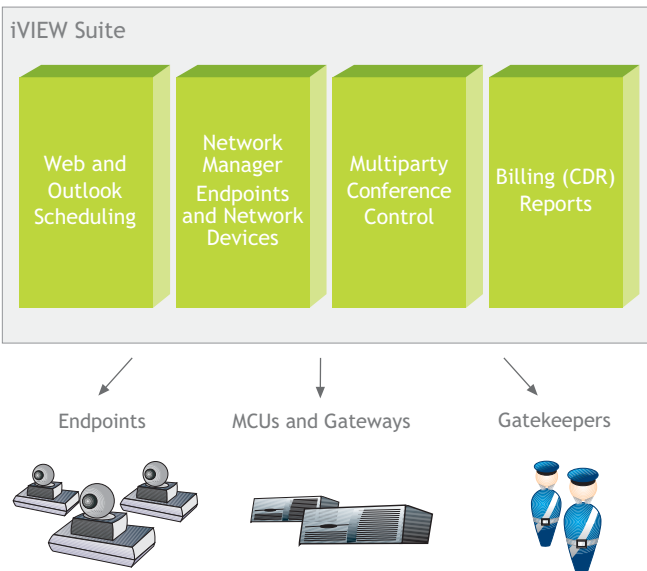

Network view for quick access to endpoints and network elements

Web Scheduling interface - schedule meetings anytime, anywhere

Multiparty Conference Control - easily manage meetings, view participants and detect faults

Designed to manage rich media communications networks, iVIEW suite is equipped with the features to manage, control and configure the networks and devices of today—and tomorrow.

## iVIEW Suite Packages

The iVIEW Suite manages a network of up to 300 endpoints
