

Global Interactive Solutions, LLC

1751 Fair Oak Way
Atlanta / Mableton, GA 30126

Werner S. Richter
VP of Audio/Video Integration

"Communication at its Pinnacle"

SCOPIA Desktop - Best of Breed

Benefits:

- On the fly audio, video and data conferencing from any notebook to other notebook users or standard H.323 (IP) or H.320 (ISDN) room based videoconferencing participants – Dial-in our dial-out.
- Service: don't have to invest in expensive hardware
- Works from anywhere: Office, Hotel, Home, Clients, etc.; Just works: no router changes/ firewall issues; No need for IT personnel to set it up
- Encryption/ Security
- Long distance free
- Charged by the minute or ask for package deals

Features:

- Share / present data – i.e. PowerPoint, Excel, Word etc.; Show entire desktop (computer training) or specific application in high resolution
- Multiple screen layouts – Speaker Site Highlighting, Site Name Display
- Multi-Point Videoconferencing on the fly – screen layout dynamically change as more video participants enter the meeting
- Moderator Control: Mute participants, disconnect participants, invite participants, enable streaming, lock meeting, terminate meeting etc.
- Live Chat built-in – Private and Public Chat
- Add phone on-only participants on the fly- dial out or have them dial into
- Enable live video streaming on the fly – video and data streams open in separate scalable windows
- Lock meeting- no one else can join (security), User and Moderator Password
- Scheduling available through Microsoft Outlook

Requirements:

- High speed internet Connection – Ideally 384kbps upload minimum – tested to work with Sprint and Verizon Wireless Cards – for the anytime, anywhere world.
- Installation of free software – download upon first use – no reboot required
- Webcam, microphone & speaker - can be provided
